

THE MEDER MYO-FIX FACIAL

BEAUTY FEATURE

January and I do not get on. Not only does it signal an end to the festive season, a dismal bank balance and extreme arctic weather but it plays havoc on my skin.

This harsh weather mixed with the drying effects of the thermostat going up, means my skin is looking tight, dehydrated and fatigued.

Beyond MediSpa situated on the 4th floor of fashion emporium Harvey Nichols have come up with the ultimate facial to rehydrate, rejuvenate and restore, ideal for minimizing the effects of winter.

KÉRASTASE
PARIS

Decoding the science of divine movement.

Long-lasting smoothness and frizz-control.

EXCLUSIVELY IN SELECTED SALONS

The Meder Myo-Fix treatment is a non-invasive correction treatment that promises to deliver results comparable to injective treatments. It's secret? The newest generation of muscle relaxing peptide that block neuro-muscular transmission and smooth out wrinkles without loss of muscles functionality. The powerful antioxidants and active ingredients penetrate deep into the skins layers to oxygenate and nourish while stimulating new skin growth and collagen production, as well as correcting mild pigmentation variances such as sun damage and acne scars.

The treatment involves your standard cleanse and scrub, followed by an incredibly relaxing facial massage to increase blood flow and encourage collagen production. Of course the treatment wouldn't be complete with out the magical peptide mask, a thick jelly like sheet that is placed over your face for 15 to 20 minutes. While the peptides work their magic, we recommend indulging in a revitalising powernap. Well it can only help right?

And the results? Visibly plumper skin and a noticeable reduction in wrinkles. The results can last up to a week, however to reap the full benefits and see long last results, Beyond MediSpa recommends a course of 6 treatments.
